SAP Solution Extensions | SAP Signature Management by DocuSign

# E-Signature Management for Regulated Life Sciences Firms

### Summary

The SAP® Signature Management application by DocuSign provides a secure, standards-based solution that lets people inside and outside your organization access, electronically sign, and send important documents anywhere, anytime, on any device. The product can be used in regulated life sciences transactions to meet Part 11 and Annex 11 regulations to streamline the product development process and reduce costs.

### Objectives

- Go paperless in a safe and secure way
- Accelerate the new-product development process while reducing costs
- Integrate regulated workflows into existing clinical, manufacturing, regulatory, and quality systems
- Automate and manage mobile digital processes of signatures and approvals

### Solution

- Support for global, industry, and local requirements for digital business
- Delivery of standards-based, verifiable digital signatures to PCs and mobile devices
- Cloud-based digital certificates for signers
- Audit trail and certificate of completion for transactions
- Test scripts from third-party partners that accelerate testing of modifications and new functions

### Benefits

- Faster, lower-cost product development processes
- Peace of mind with compliance controls and audit logs
- Flexibility to support cloud and mobile access
- Simplified digital certificate management

## SAP Information Sheet

With the SAP® Signature Management application by DocuSign, it's easy to adopt secure, paperless transactions by implementing digital approvals, agreements, and processes. This trusted solution supports standards-based and mobile signatures and provides cloud-based digital certificates to signers at the time of signing, which accelerates product development, reduces costs, and simplifies digital certificate management. And by auto-generating an audit trail and certificate of completion for transactions, it greatly simplifies certificate management.

SAP Signature Management meets identity management, signature meaning, and manifestation requirements – for example, by enforcing two-factor identification when people access and sign documents. Already, approximately 150 global

## Quick Facts

life science companies have adopted this technology to securely execute business processes requiring an e-signature or sign-off, as specified by the FDA.

This proven e-signature solution is incredibly simple to use and can help you ensure compliance with local country requirements such as Annex 11. And through global partnerships, it aligns with industry and local country requirements for doing business in a compliant manner.

SAP Signature Management integrates with common document authoring applications and document management and identity management systems, increasing productivity while helping you get even more value from existing IT investments.
