SAP Crystal Reports 2020

FILE FORMATS AND DESCRIPTIONS

| Format | Description |
|---------------------------------------|---|
| Crystal Reports | This .rpt format preserves the most formatting of all output format options. It produces a normal, editable report. |
| Crystal Reports (RPTR) | This .rprr format produces a read-only Crystal report. |
| Microsoft Excel | This is a page-based .xlsx format that converts your report contents into Excel cells and retains most report formatting but does not export line or box objects from your report. Microsoft Excel Workbook has a limit of 16384 columns in a worksheet |
| Microsoft Excel (97-2003) | This .xls format attempts to preserve the look and feel of the original report. It preserves data and does not merge cells. You must specify some formatting properties for the report. |
| Microsoft Excel (Data Only) | This .xlsx is a record-based format that is useful for data transfer but retains less formatting information, but does not merge cells. This format can also export certain kinds of Crystal Reports summaries as Excel functions. |
| Microsoft Excel (97-2003) (Data Only) | This .xls format saves only data, and each cell represents a field. |
| Microsoft Word (97-2003) | This .doc format preserves as much formatting as possible, including graphics. Each object appears in an individual text field. |
| PDF | .pdf format |
| Rich Text Format (RTF) | This .rtf format preserves as much formatting as possible, including graphics. Each object appears in an individual text field. This option is available only from a web viewer. |
| Microsoft Word - Editable (RTF) | This .doc format preserves less formatting than the Microsoft Word (97-2003) option. Text appears in lines, and images are placed inline with text. |
| Plain Text | .txt format |
| Paginated Text | You must specify some formatting properties for the report. |
| Tab Separated Text (TTX) | This format places a tab character between values. You must specify some formatting properties for the report. |
| Separated Values (CSV) | This .csv format places a specified character between values. You must specify some formatting properties for the report. For example, if you select this option, you must enter characters for the separator and delimiter. |
| XML | .xml format |
